Aloha all. As an FYI, CardnoTEC is unable to get us the ground water report until 9/5/2014. Therefore, it will not sent to you until the following week. I believe it is normally due at the end of this month (August). Thank you for your patience and understanding as we recover from tropical storm Iselle. We anticipate having our communications restored by 9/5/2015.

> Aloha. This report was mailed out yesterday. I am additionally sending this report to you via my personal email as we still do not have business communications at our facility due to the storm Iselle. Additionally, these are pictures of the documents but seem to be quite legible. If anyone cannot read these documents please let me know and I will resend once we have restored communications.
